PROFESSIONAL SUMMARY

Undergraduate student studying Computer Information Systems with a minor in Business and hands-on experience in data analysis, database design, and web-based systems. Experience in Python and SQL through projects involving exploratory data analysis and relational database development. Foundation in data management and translating data into meaningful visualizations to identify trends and patterns. Seeking to apply technical and analytical skills in a professional environment.

Key Skills

- Excel – Novice-Intermediate (data entry, charts, graphs)
- Python – Novice-Intermediate (basic scripting, visualization)
- HTML, CSS, JavaScript – Novice-Intermediate (front-end development, responsive design)
- SQL – Novice-intermediate (queries, database design)
- Tableau – Novice-Intermediate (data visualization, dashboards)
- Productivity Tools – Google Workspace (Docs, Sheets, Slides), Microsoft Office Suite (Excel, Word, PowerPoint)
- Languages – Fluent in Spanish and English

PROFESSIONAL EXPERIENCE

Ever Lasting, Remote

09/2026 - Present

Business Development Intern

- Researched and analyzed brand partnerships to identify potential business opportunities and audience connections.
- Created a partnership case study to evaluate collaboration strategies and business benefits.
- Researched potential partnership opportunities based on brand alignment and target audiences.

Notre Dame of Maryland University, Baltimore, MD

09/2024 - Present

Desk Assistant

- Manage front desk operations, assist students, and maintain a welcoming environment.
- Recorded and maintained important information in spreadsheets to support supervisor decision-making.
- Demonstrated professionalism and confidentiality in handling sensitive information.

Chevy Chase Club, Chevy Chase, MD

05/2024 - 08/2025

Seasonal Poolside Server

- Delivered high-quality customer service to a large number of daily members in a fast-paced environment.
- Trained new team members on customer service expectations and service procedures.

Notre Dame of Maryland University, Baltimore, MD

03/2024 - Present

Club President & Club Vice President

- Lead and organize monthly meetings for the Hispanic Latinx Union and the Society of Women Engineers.
- Develop and implement strategies that support club growth and member involvement on campus.
- Formulate and enforce club rules, regulations, and policies.

PROJECTS

Hospital Emergency Room Dashboard

09/2026

- Analyzed hospital emergency room data using Tableau to understand patient demographics, admission patterns, wait times, and patient satisfaction.
- Created interactive visualizations to examine ER visits over time, patient age, gender, race, admission rates, average wait times, and satisfaction scores.
- Built a dashboard with KPI metrics and charts to identify trends and present key findings from the dataset.

Nancy Kreiter Research Day Project

04/2026

- Developed a web-based security service platform to allow users to view services, submit bookings, and communicate with the company.
- System stores and manages user accounts, service bookings, and reviews in a centralized database for efficient data handling.
- All user inputs (login, booking requests, and reviews) are securely saved, retrieved, and updated using a structured database system.

Database Design & Implementation for an Online Knitting Shop

12/2025

- Designed and implemented a relational database to manage knitting products, including yarn, needles, accessories, and suppliers.
- Created and populated database tables using SQL to store product details such as price, size, weight, yardage, and inventory levels.
- Wrote SQL queries to retrieve and analyze data, including tracking inventory and identifying cost-effective products.

Exploratory Data Analysis

03/2025

- Used open student depression dataset to understand and analyze depression levels among students.
- Utilized Python to create visualizations (graphs/charts) to identify relationships between lifestyle factors, academic pressure, and depression levels.
- Cleaned and organized the data to ensure accuracy and to support understanding of key trends.

Front-end for an Online Knitting Shop

12/2025

- Designed and developed a full-stack e-commerce prototype using HTML, CSS, JavaScript (front end) and Python with Flask (back end)
- Implemented secure login system with token expiration and session validation to control user access.
- Built interactive front-end features including product browsing, add-to-cart functionality, and checkout workflow.

EDUCATION

*Bachelor of Science in **Computer Information Systems**, Minor in Business*
Notre Dame of Maryland University (NDMU)
Baltimore, MD

Current GPA: 3.375

Anticipated graduation date: May 2027

CERTIFICATIONS

- **Data Fundamentals Certificate** — IBM SkillsBuild, June 2026

Topics: Data analysis, data visualization, spreadsheets, databases, data-driven decision-making.

- **Introduction To Power BI Certificate** — Microsoft Courses on Simplilearn, September 2026

Topics: Power BI, data visualization, dashboards, data modeling, reports
